

SJP/NPM

14 January 2019

Dear Parent/Carer

From February, all KS3 Science homework will be set on an online homework and revision system called Educake. Students can use Educake on a PC, tablet or smartphone by going to www.educake.co.uk. Students also have access to academy PCs before school, during lunchtime and after school.

Every student will be given an Educake log in from their teacher. In addition to teachers setting homework on Educake, students can also create their own tests for revision. Every question is automatically marked, and students get instant feedback.

We really hope you find Educake useful. In studies at schools that use Educake, students who answered more than 500 questions achieved higher GCSE scores than their expected target grade.

If you have any questions, please do not hesitate to contact me at the academy. Alternatively, you can contact Educake directly via email at support@educake.co.uk.

Yours sincerely

S Plant

Mrs S J Plant
